

Getting to know lockncharge®

Who is LocknCharge?

LocknCharge is a company dedicated to the design, manufacture and functionality of the highest quality security, charging and transport solutions for mobile device deployments. With over a million devices protected in LocknCharge solutions throughout 20+ countries across the globe, we make our customers' lives easier by developing charging solutions with scalable and modular designs that take workflow into consideration.

Why Choose LocknCharge?

Many organizations are investing in mobile device technology to reduce operational costs, increase customer satisfaction and increase efficiencies for cumbersome and manual administrative tasks. LocknCharge allows organizations to reach their goals by ensuring that devices are always charged, accessible and ready to be used. Whether your business or school is deploying 5 or 100,000 mobile devices, LocknCharge offers products and support to integrate mobile technology seamlessly into workflow.

Despite the high-levels of attention mobile device deployment programs receive, many project sponsors haven't considered the logistical challenges behind a deployment. All of our mobile device Charging Stations are designed to store, charge and secure mobile device investments that will enable communication and help drive productivity—ultimately making a positive contribution to your bottom line.

Our charging solutions are designed and developed with extreme consideration for the end user. We listen to the needs of our customers and design products to solve pain points specific to their needs. Because of this, our products boast new-to-market features not offered by our competitors: high-quality components, LED lights, ultra mobile designs, a back-end management portal, compact solutions, lifetime warranties and much more. We take great pride in our excellent customer service, always putting the customer first. Our customers are our partners—and by working hand-in-hand, we're able to provide the best solution for each customer's unique needs.

It just makes life easier.

The Importance of Centralized, Secure Mobile Device Charging

Product features that just make life easier.

Extremely Durable & Lifetime Warranty¹. Organizations make a considerable investment in mobile devices—which is why we stand behind our products with a lifetime warranty. Choosing a LocknCharge product is an economical decision as you won't be replacing your charging unit in the future.

Highly Secure. All of our Charging Carts and Stations include a heavy duty lock, and nearly all of our products feature welded steel construction.

Simple Setup. Easy setup and cabling of our Charging Carts and Stations streamlines the charging process.

Proprietary Power Management. With ECO Safe Charge™, devices will not become over charged—increasing the longevity of their batteries. Set the ECO Timer to turn off power after a set amount of time. You'll see a reduction in energy consumption, carbon emissions and energy bills.

Designed with Space in Mind. Our charging solutions make the most of their compact sizes. Several of our Carts feature a top-sliding lid that duals as a work surface, and many of our compact Charging Stations are wall or desk mountable to keep floor space open.
