

LocknCharge for Education

LocknCharge is a company dedicated to the design, manufacture and functionality of the highest quality security, charging and transport solutions for mobile device deployments in education. Our vision is to be globally recognized as the most innovative and trusted brand in developing solutions for managing deployments of mobile technology. Our mission is to make life easier for schools and organizations implementing mobile technology.

It just makes life easier...

The LocknCharge Story

Australian educator Paul Symons founded LocknCharge in 1999 when he noticed a need for securing laptops and devices in his school. He started by building security leashes and chain kits in his back yard in his spare time and installing them in a few schools throughout Australia. After successfully deterring theft, word spread throughout Australia and demand for his products grew to the point where Paul left his teaching job to fully commit to LocknCharge. Expanding globally over the past 5 years, thousands of schools and organizations have now experienced the difference of LocknCharge: responsive customer service, innovative and high-quality design, lifetime warranty and Baskets by LocknCharge.

It just makes life easier.

Made for Education. LocknCharge solutions are designed by educators specifically for the unique needs of the education market. With our roots in education and our continuous feedback loop with educators, our products are built to enhance mobile deployments.

Trusted Partner of Large-Scale Mobile Deployments.

Several large-scale districts including Coachella Valley Unified School District and Putnam City Schools, have used our solutions to enable their mobile device deployments.

Baskets by LocknCharge. As the only Cart manufacturer to include baskets, deployment of devices has never been easier. Baskets by LocknCharge allow carts to be shared by classrooms and devices to be distributed more easily and safely. Devices can be distributed in a fraction of the time, meaning teaching happens faster.

Lifetime Warranty². Schools and organizations spend a lot of money on the devices that go into our products, and we stand behind our products with a life time warranty. School life can be tough on carts, going with a LocknCharge cart is more economical in the long run as you won't be replacing carts.

Modular Design. Our products are designed to flex as your deployment does. Carts can be upgraded from charge only to sync and charge. A single cart can accommodate several device sizes.

Proprietary Power Management. Assure that the right amount of power is distributed to devices when charging: no under, over or inconsistently charged devices.

Highly Secure. Two-point locking system to lock away the devices in the storage area, while an optional anchor kit can lock down the whole Cart.
